

## Panel at the 2020 Conference of the INTERNATIONAL SOCIETY FOR HUMOR STUDIES

Bertinoro, Italy • June 29 to July 3, 2020

<https://eventi.unibo.it/ishs-2020>

Humor is a universal and ubiquitous facet of human communication, but is among the hardest to process in artificial intelligence environments.

Application areas include, but are not limited to:

- Human–computer interaction
- Computer-mediated communication
- Intelligent writing assistants
- Conversational agents
- Machine and computer-assisted translation
- Digital humanities
- Natural language processing
- Computer vision

The 3rd Panel on Humor and Artificial Intelligence at ISHS 2020 solicits abstracts on the computational representation, detection, classification, interpretation, and generation of any and all forms of verbal or non-verbal humor.

Conveners:

**Luca Bischetti**

University School for Advanced Studies IUSS Pavia

**Kiki Hempelmann**

Texas A&M University–Commerce

**Tristan Miller**

Austrian Research Institute for Artificial Intelligence

**Julia M. Rayz**

Purdue University

**Manfred Stede**

University of Potsdam

**Submission deadline: March 1, 2020**
